

Australian First: LEGEND releases locally manufactured Secure Digital flash media

Adelaide, South Australia - (2nd March 2005). In an Australian first, ASX listed LEGEND Corporation has manufactured the first Australian made Secure Digital flash media. The devices take advantage of an ever growing demand for digital camera's, MP3 players and digital storage. Rob Kester Sales Director for Legend sees this market as only getting bigger "Flash sales worldwide in 2003 were US\$11.6 billion, in 2004 they were US\$15.9 billion and we expect the market to continue to expand this year as more and more consumers engage in the use of digital devices that utilise this technology, in particular mobile phones & digital cameras" he said.

Legend offers a complete range of LEGEND flash media that are sold through Legend's operations both in Australia and internationally through Legend's overseas subsidiaries. "We have continually ramped sales of this product around 30% per month in the last year and we expect to deliver around AUD\$30 Million dollars of sales of flash products over the next year" Kester added. "Manufacture of flash memory is a perfect addition to our core memory module business, we see this as a more durable product than a memory modules with a greater amount of sales opportunities due to them not being dependant on the sale of a PC or a PC upgrade". In addition the continued adoption of digital photography, music and storage is allowing us to sell multiple flash media to the same consumer. Legend flash media are available through LEGEND resellers, OEM partners and mass merchants such as Dick Smith Electronics, Target, Kmart & Harvey Norman to name a few.
